Amendments to the Specification

Please amend the 1st full paragraph, lines 9-23 on page 6 of the specification as follows:

An exemplary user device ~~109~~ 120 (FIG.2) includes a radio transceiver 202 ~~200~~ ~~(FIG. 2)~~ for communicating with a base station via a communication link established by antenna 203. The transceiver may be a single transceiver, such as a cellular telephone receiver or a data modulator/demodulator, or it may include multiple transceivers such as multiple cellular transceivers, or an 802.11 transceiver and a cellular radio transceiver, an Ethernet transceiver and a cellular transceiver, or any other combination of wired and wireless transceivers. A controller 204 ~~202~~ includes processing and memory 206 for controlling the user device operation. The controller 204 may include integrated memory, or a micro-controller and external memory, and the memory 206 may be volatile and/or non-volatile memory. As used herein, micro-controller can be implemented using any microprocessor, digital signal processor, programmable logic, discrete logic units, software processes, a combination thereof, or the like. The user device 120 will typically include a user interface 208, such as a keypad, touch screen, speaker and microphone.
